

# Space WebQuest

Space is the solar system that makes up different galaxies. The galaxies includes plants and stars, like the planet we live on Earth. It is important to learn about space and understand it. Below are some steps I want you to follow in order to learn about space and our galaxy.

1. Go to the website  
<https://www.youtube.com/watch?v=h5bVZTpVxy4>
2. Click and watch the Solar System Lesson for kids | Learn about planet, stars, glaxy
3. Once you have watched the video go to  
[http://www.nasa.gov/audience/forstudents/k-4/playandlearn/playandlearn\\_archive\\_1.html](http://www.nasa.gov/audience/forstudents/k-4/playandlearn/playandlearn_archive_1.html)
4. Play the game: Go to the Head of the Solar System
5. Print out the game completion page at the end
6. Next play the game: Dress me for Space
7. Print out the game completion page at the end with your person dressed
8. Answer the questions on a blank word document. Save it as Space followed by your name:
  1. What is our galaxy called? Name all of the planets in out glaxy.
  2. What lanet is closest to the sun?
  3. What planet is farthest from the sun?
  4. What planet is the biggest planet?
  5. Explain what astronauts wear when they are in space.
9. Once you have answered the questions, email them to me at [gabriell.giddings@smail.astate.edu](mailto:gabriell.giddings@smail.astate.edu)
